MOHAMED MORSY EID

MACHINE LEARNING & AI INTERN | DATA ANALYTICS | PYTHON

Egypt | elmohamedmorsyeid@gmail.com | linkedin.com/in/mohamed-morsy-23427819b | github.com/mohamedmorsy-ai

PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate (expected 2028) with applied experience in Python, data preprocessing, exploratory analysis, feature engineering, and machine learning. Built and deployed an economic forecasting dashboard covering 20 countries and developed practical ML workflows during the FlyRank AI educational internship. Interested in Machine Learning, AI, and Data Science internships or entry-level opportunities.

TECHNICAL SKILLS

Languages & Data: Python, pandas, NumPy, data cleaning, missing-value handling, exploratory data analysis (EDA), feature engineering

Machine Learning: scikit-learn, Linear Regression, Logistic Regression, Random Forest, classification, regression, model evaluation, MAE, RMSE, time-aware validation

Visualization & Development: Matplotlib, Seaborn, Plotly, Streamlit, Jupyter Notebook, Git, GitHub

LLMs & AI Tooling (coursework): Claude API, Model Context Protocol (MCP), Claude Code, AI agents, Amazon Bedrock, Google Vertex AI

EXPERIENCE

FlyRank AI | Machine Learning Intern (Educational Internship) | 2026

- Worked on hands-on machine learning assignments and a public internship repository using Python, notebooks, model development, and analysis of anonymized search-performance data.
- Practiced building reproducible data and model workflows; completed related Anthropic Academy learning modules on LLM APIs, MCP, Claude Code, and agent-oriented tools.

SELECTED PROJECTS

Global Economic Data Analysis & Forecasting | Python, pandas, scikit-learn, Streamlit

- Cleaned and analyzed GDP growth, inflation, and unemployment observations for 20 countries spanning 1990–2025; developed time-based features and exploratory visualizations.
- Compared prior-year baseline, Linear Regression, and Random Forest models with historical evaluation; communicated uncertainty and the experimental nature of 2026 estimates.
- Deployed a Streamlit application with interactive country comparisons and model insights. GitHub: github.com/mohamedmorsy-ai/Global-Economic-Data-Analysis

FlyRank ML Internship Project Repository | Python, Jupyter, DuckDB (learning track)

- Organized applied ML notebooks and experiments for search-ranking and discoverability analysis using anonymized data. GitHub: github.com/mohamedmorsy-ai/flyrank-ml-internship

EDUCATION

Delta University for Science and Technology | Faculty of Artificial Intelligence | Expected Graduation: 2028

CERTIFICATIONS & TRAINING

IBM (Oct 2026): Supervised Machine Learning: Regression; Supervised Machine Learning: Classification; Unsupervised Machine Learning; Exploratory Data Analysis for Machine Learning; Deep Learning and Reinforcement Learning.

Anthropic Academy (2026): Building with the Claude API; Claude Platform 101; Claude Code in Action; Introduction to Model Context Protocol; MCP: Advanced Topics; Introduction to agent skills; Introduction to subagents; Claude with Amazon Bedrock; Claude with Google Cloud Vertex AI.

Huawei ICT Academy (Aug 2026): HCIA-AI V4.0 Course; HCIA-Big Data V3.5 Course. | Cisco (May 2026): Security Operations Center (SOC).

Additional Training: AI-Bdaya Engineering Masterclass (60 hours); ICDL Training Course (Science and Technology Academy).
